

## Overview of the capacity possibilities of all group halls during Corona times

Due to the 1,5-meters distance policy, we have made a distinction between two capacity layouts;

*Optimal safety capacity* → This layout takes exit routes into account. Everyone can leave the hall at any time while maintaining to the 1,5-meters distance.

*Maximum capacity* → In this layout there are no exit routes. Participants are not able to leave the hall and maintaining the 1,5-meters distance. It is however possible to safely offer this layout with the following behavioural agreements:

- A toilet break or any other reason to take a break is only allowed during planned breaks.
- Entering and leaving the hall has to be a fixed procedure; when entering the hall, the window spots will be occupied first and from there the hall will be filled until the last spots at the entrance are occupied. When leaving the hall, this procedure will be followed in the opposite direction.
- Tip; Let the participants who need more sanitary breaks have a spot closer to the entrance.

### Overview of all group halls

Pay attention; The Tormentil and Wederik are in the same building. If you choose the Tormentil as your group hall, you can extend your capacity possibilities by involving the Wederik and if necessary connect these rooms online.
